Professional Profile

The revision of the professional profile of the conductors' profession is finished! All members of the ECA were invited to make their contributions, to share their thoughts and ideas. Now there is a **common document** that serves to provide a greater understanding of "the conductor" as the specialist professional who delivers the Conductive System. All together we created a united framework in order to place CE and the conductor in a European context. The professional profile will be available at the ECA Info desk.
